DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 20-24, drawn to an input device, classified in class 345, subclass 156 (i.e. peripheral interface input devices).
 - II. Claims 10-19 and 25-37, drawn to a communication authentication technique, classified in class 713, subclass 171 (i.e. key exchange).

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product (i.e. Invention I) as claimed can be used in a materially different process (compared to Invention II) such as using the identification key simply to label an electronic communication as originating from a particular user/location.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
